

NOTICE:

The BOOK DONATION DROP-OFF Program has been DISCONTINUED effective immediately.

Unfortunately, books can no longer be accepted in the bin at the bottom of the school drive.

We thank you for your past support of this endeavor.

Donations are still being accepted with appreciation at the Planet Aid bin to benefit the PTCA

News & Announcement

On May 2nd we had a delightful indoor picnic at Kathryn Karnecki's home.

That was the last meeting until September.

Passing the torch...

Edie Hasbrouck has retired as leader after fifteen years. The good news is that Joyce Handy has agreed to take over and Tom Hastings will assist her. For information about future meetings please contact Joyce at **352-7586**.

ISRAEL LOVELAND, MD. born in Gilsum

Nov 3, 1850

Below is an excerpt from The Genealogy of The Loveland Family In The United States of America, VOL.3

"Dr Loveland is a laborious student in his profession. He has made a careful study of the alcoholic habit and also of the various narcotic habits, and for several years has been receiving patients at his residence for his special treatment. In his researches he has discovered, as he verily believes, the application and method of compounding a drug that acts as a specific in these habits and also as a specific in some functional nervous diseases. The Triple Gold Cure Company, of Gilsum, of which Mr. Loveland is president, has recently (1894) been organized to systematically carry out his treatment of the alcoholic, morphine and tobacco habits. He claims the Triple Gold Cure treatment absolutely destroys the appetite for strong drink and for narcotic drugs. The cure is permanent and no bad results are experienced during and following treatment. Mr. Loveland is a contributor to the best medical literature of the country."
